

Pineapple End Cutter CEX

The Pelamatic pineapple end cutter makes it possible to leave the fruit ready for immediate peeling with little effort, becoming a very practical accompaniment to Pelamatic pineapple peelers. Its design allows the waste to be extracted in a single blow, which makes it highly useful for pineapple peeling processes.

Our end cutter comes with a special stainless steel reinforcement to keep the piece immobile and facilitate cutting, avoiding wasted time and making the most of the fruit.

General characteristics

- Strong, fast and efficient.
- Manual machine.
- Allows quick and safe cleaning by using warm water and a cloth. Recommended daily cleaning.
- Two pieces of stainless steel for a good hold of the fruit.
- Designed with a stainless steel structure.
- Advisable to facilitate the peeling processes in Pelamatic pineapple peelers.
- Light and easily transportable.
